

Wet Chemical Extinguishers

Stored Pressure

Fire Extinguisher Product Specification

MODEL Wet Chemical

Capacity (litres)	6
Full Weight (kg)	8.8
Height (mm)	560
Cylinder Diameter (mm)	185
Working Pressure at 20°C	7 bar
Fire Rating	13A:75F
Kitemarked	Yes
Discharge: Wet Chemical M1022 + 3 ltrs water	

The wet chemical extinguisher is the only choice for Class F fires caused by burning cooking oils and fats. An extremely effective fire fighting tool which cools the burning oil and chemically reacts to produce a soap-like solution, sealing the surface and effectively cutting off the oxygen supply needed for combustion. Simple to use with a controllable discharge, mainly used for areas containing large deep fat fryers etc.

FGM Fire Protection reserve the right to change the design and specification of fire extinguishers without prior notice.
